What herbs would take care of a cold?

The most common are Chamomile flowers, Sage leaves, St. John's Wort, Rosehip, and Linden flowers.

** The best cure for common cold is a hot drink made of herbs.*

You can use Linden flowers, Raspberry leaves, or Chamomile to lower your fever, or as an anti-inflammatory and calming tea.

** If you have a cough, the best remedy is Sage.*

Hot brewed tea will reduce irritation of mucous membrane and a dry cough.

** Runny nose and nasal congestion could be treated with water extract of Sage, St. John's Wort, or Labrador herb (Wild Rosemary).*

Use of these herbs will reduce irritation, relieve discharge, decrease inflammation.

** Boost your immune system with these herbs:* Rosehip fruits, Foxberry (Lingonberries), Viburnum Berries, Echinacea, or Hyssop.

Regular use of these herbs as hot brewed tea will ensure the body's best resistance to viruses and bacteria all year round.
